

ANKUR VARSHNEY

SENIOR TABLEAU BI DEVELOPER | DATA ANALYTICS | AI-POWERED BI SOLUTIONS

+91 8452893918 | vyankur@gmail.com | <https://public.tableau.com/profile/ankur.varshney> | <https://github.com/vyankur> | <https://linkedin.com/in/vyankur>

PROFESSIONAL SUMMARY

- **10+ years** of experience delivering BI, analytics, and reporting solutions across Insurance, Banking, Retail, Power, Aviation, and Financial Services.
- **Tableau** specialist with deep expertise in dashboard design, semantic modeling, performance tuning, and enterprise reporting.
- Experienced in building scalable analytics platforms, translating business requirements into actionable dashboards, and supporting strategic decision-making.
- Known for **owning** end-to-end initiatives, driving adoption, and partnering closely with business and technology teams.
- Hands-on exposure to **AI-enabled BI**, cloud data platforms, and modern analytics workflows with a strong focus on impact and usability.

PROFESSIONAL EXPERIENCE

Senior BI Developer / Data Analyst

Sun Life Financial, Gurugram

Domain: Insurance | HNW, Attrition, Adoption & Product Performance

Apr 2023 – Present

ENVIRONMENT: Tableau Desktop/Server/Cloud, Tableau Prep, Amazon Athena, AWS S3, PostgreSQL, Amazon SageMaker, Python, LangChain, OpenAI API, BMAD Framework, GitHub Copilot, Git/GitHub

- **Administration:** Managed Tableau Server and Cloud scheduling, permissions, deployment automation, and release processes across Dev, UAT, and Production.
- **Performance:** Optimized dashboard performance using Tableau Performance Recording, query tuning, and a balanced live/extract strategy.
- **AI:** Built Tableau dashboard extensions with LangChain and OpenAI for conversational analytics and AI-assisted decision support.
- **Platform:** Developed an enterprise-wide insurance analytics platform spanning HNW, attrition, adoption, and product performance use cases. Designed a custom platform adoption dashboard suite used by VPs, Product Owners (PO), Change Managers, and BU Heads to track performance and engagement, driving a **30% increase in platform adoption** across business units.
- **Customer Experience:** Designed and developed a series of dashboards integrating client feedback from **Qualtrics, Salesforce, and social media channels** at various levels of the customer journey, contributing to a **20% increase in the customer satisfaction index**.
- **Impact:** Delivered advanced financial reporting with entitlement-based RLS, complex calculations, and robust null handling for executive reporting accuracy.

Tableau & Data Viz Lead / Developer

HCL Technologies, Pune

Domain: Banking and Financial Services | Financial Planning, Budgeting & ESG Compliance

May 2021 – Apr 2023

ENVIRONMENT: Tableau Desktop, Tableau Prep Builder, SAP HANA, Databricks, PySpark, SQL, Python

- **Planning:** Led a team of 2 developers to design and develop a **5-year financial planning and budgeting dashboard suite** for **Deutsche Bank**, covering inter- and intra-department spend analysis across programs — delivered exclusively for **senior leadership and CXO-level decision-makers**.
- **ESG:** Built compliance dashboards to track sustainability metrics, governance scores, and disclosure requirements across the bank's investment portfolio.
- **Integration:** Connected Tableau live to SAP HANA for high-performance query execution and leveraged Databricks/PySpark for ETL and data preparation workflows.
- **Governance:** Applied row-level security to restrict data access by department and user roles, partnering with finance teams to translate requirements into scalable reporting solutions.

IT Analyst (Senior BI Developer)

Tata Consultancy Services, Mumbai, Abu Dhabi & Dubai

Domains: Banking, Aviation, Retail, Supply Chain, Manufacturing

Oct 2015 – Apr 2021

LEADERSHIP & DELIVERY SCOPE: Led a team of 5 BI developers in delivering end-to-end data visualization and database solutions across Banking, Aviation, Retail, Manufacturing, and Supply Chain clients.

HR Analytics & Risk Reporting – Client: First Abu Dhabi Bank (FAB)

- ENVIRONMENT:** Tableau Desktop, Oracle, SQL, PL/SQL, SQL Developer, Excel
- **Interactive Dashboards:** Created interactive HR dashboards with multi-source data blending, URL actions, parameters, custom shapes, and cross-dashboard navigation using action filters.
 - **RLS & LOD Calculations:** Implemented entitlement-based RLS logic using dynamic entitlement tables via SQL joins, and built FIXED/INCLUDE LOD calculations to compute headcount averages while handling null values in aggregation.
 - **Database & Query Preparation:** Developed and maintained SQL queries, stored procedures, custom functions, and database views in Oracle to prepare and load reporting tables.

Data Governance: Master Data Management – Client: GE Power

- ENVIRONMENT:** Tableau Desktop/Prep, Oracle SQL, Greenplum (GPDB), Aurora DB
- Built interactive dashboards for defect tracking during **legacy-to-AWS cloud migration**, reducing manual reporting effort by **95%**, processing time by **90%**, and achieving **USD 50K** cost savings.
 - Designed database views, indexing structures, and validation statements in GPDB/Aurora DB, using Tableau Prep to automate quality checks.

CAS Compliance Assessment Dashboards – Client: GE Power

- ENVIRONMENT:** Tableau Desktop/Prep, Oracle SQL, Python, Excel
- Built **real-time** compliance monitoring dashboards for production events, configured automated refreshes and subscription mailers on Tableau Server, and coordinated with Data Ops for production deployments.
 - Developed a Python fuzzy-matching deduplication script with scheduled execution to feed clean data tables directly to Tableau.

Supply Chain: Lead Time Dashboards – Client: GE Power

- ENVIRONMENT:** Tableau Desktop, Talend, Oracle SQL
- Designed interactive lead time dashboards with item-level drill-down across delivery stages, **predictive completion tracking**, and **severity-based alerts for delayed shipments**, enabling proactive supply chain decisions. Tuned performance via Tableau Performance Recording and SQL refactoring, reducing load times by **35%**.

TOOLS & TECHNOLOGIES

BI & Visualization	Tableau Desktop, Tableau Prep Builder, Power BI, TabPy, Tableau APIs (REST, Metadata)
Databases & SQL	Oracle SQL, PL/SQL (Stored Procedures, Custom Functions), PostgreSQL, Aurora DB, SAP HANA, Greenplum (GPDB); IDEs: SQL Developer, DBeaver, pgAdmin
Cloud & Data Platforms	AWS S3, Amazon Athena, Amazon SageMaker, AWS Glue, Amazon Bedrock
AI & Modern Dev	GitHub Copilot, LLMs (Claude, GPT), RAG (Knowledge Bases), BMAD Framework, Python
Data Engineering & ETL	Databricks, PySpark, AWS Glue, Talend Data Integration, Tableau Prep Automation
Version Control & Agile	Git/GitHub, Rally Agile
Domain Experience	Insurance (Life & Health), Investment Banking, Retail, Power, Aviation, Financial Services, Supply Chain, Manufacturing

ACHIEVEMENTS & CERTIFICATIONS

- **2025 AWS Cloud Quest Winner** for hands-on problem solving using AWS Skill Builder Labs
- **Sun Life:** Quarterly Award for dashboard innovation and reporting automation
- **TCS:** On the Spot Award, Special Achievement Award for Agile Initiative, and Best Performer of the Month Award
- **Certified Tableau Desktop Specialist** and **Tableau Data Scientist** (Accredited Credentials)

EDUCATION

BTech. (Electronics & Communications) • Krishna Institute of Engineering and Technology, Ghaziabad • UPTU, Noida | 2015
